## Features

## Long throw range

Good foam quality due to special nozzle
Stainless steel

## Description

The LSB type foam branchpipe produces low expansion foam of high quality. The quality is generated by the optimal air inlet nozzle. The advantage of low expansion is the long throw range and the excellent cooling effect.

## Application

- Fire brigades
- Petrochemical plants
- Tank farms
- Loading areas
- Marine \& offshore

## Recommended Foam Concentrates

- Protein \& Fluoroprotein
- FFFP
- AR-FFFP
- AFFF
- AR-AFFF
- Multi purpose foam

## Operation

The branchpipe should be connected to the hose-line. It is also necessary to flush the branch-pipe with clear water after every use.
